

Drive-by Downloads

A single visit can compromise your device.

A drive-by download is a cyberattack where malware installs on your device without you knowing, often by visiting unsafe sites, clicking ads, or opening pop-ups. It sneaks in automatically by exploiting browser or system flaws.

Stay Safe from Drive-by Downloads

- Keep your system & browser updated
- Use antivirus and enable pop-up blockers
- Don't click suspicious ads or links
- Don't download from untrusted sources
