147	Appendix-5	79	3.6.2.5	3.6.2.5 Monitor and maintain Factor of Safety (FoS) : Penalty for not maintaining target FoS : –Factor of Safety (FoS)II, i.e. the ideal amount of Cash that should be present in the ATM/CASH RECYCLER to prevent Cash out and idle cash situation. FoS will be fixed at 2.0 i.e. for every Rs.100 withdrawn, there should be upto Rs.200 in the machine. It can be calculated as: [Opening cash in the ATM/Cash Recycler + Amount of cash replenished] ----- = 2 Net cash withdrawn by customer during the day FoS will be calculated on Daily basis at every individual ATM/CASH RECYCLER level wherever cash replenishment is outsourced (except days prior to the Bank Holiday) The FoS will be 2 for such instances, i.e. 2 times the cash withdrawn to be present in the ATM FoS is applicable to only those machines where cash replenishment/ services are outsourced. There shall be a relaxation on days prior to the holiday because cash may not be available from the Bank on Sundays/ Holidays. The FoS will be 2.5 for such instances, i.e. 2.5 times the cash withdrawn to be present in the ATM. However, this requirement/formula	1. As per industry standard opening / dispense is the right method to calculate FOS and given formula is implicitly stating that Bidder should maintain FOS of 1 as it includes replenished amount as well. Basis opening / dispense rationale FOS can be maintained up to 3 in weekdays and it will have increase during weekend and holidays depends on numbers of day holiday. Let's say for normal weekend where Sunday is holiday FOS would be 4. 2. FOS shall be calculated at entire base, maintaining at ATM level would be difficult as there is technical dependencies, variation of dispense trend etc. 3. Maintaining of FOS 2 will be very difficult, this will increase cash outs. 4. Benchmark of FOS better to be finalized between Bank & MSP for each month depending on number of holidays in the month. 5. Penalty of excess cash amount in channel and vault retention is too high, bidder would request to revise penalty amount.	Please Refer the Amendment

				may undergo a change depending upon the business needs. If FoS is more than the limit prescribed by the Bank as mentioned above, then interest @18.60% will be levied on the excess cash found above the prescribed norm. The following formula shall be used by the Bank to arrive at the amount of excess cash: Excess cash = opening balance + cash replenished - Ideal cash; where Ideal cash = Cash dispensed * Target FoS The Vendor shall not hold or retain in their vault more than 15% of the total cash taken from Bank on monthly basis. If the retention is more than 15%, a penalty of 18.6% per annum shall be levied on the excess cash retained in the vault during the month. However, there will be no FoS penalty for first three months for any newly installed ATM. This relaxation is provided to understand the dispensing pattern of the newly installed ATM/Cash Recycler for the initial period of three months.

The ATM/Cash Recycler monitoring solution currently declares an ATM/Cash Recycler as 'cash out' if switch simultaneously receives 'currency out' message in respect of all configured/present cassettes in the ATM/Cash Recycler. To align this with ADMIN balance, cases of ADMIN balance less than 25000/- out of above will be considered as 'cash out' for penalty. For cash outs penalty shall be charged as under: (i) ₹1000/- per ATM/Cash Recycler for each hour of cash out OR Any penalty(ies) imposed by regulatory authorities for cash out in ATMs/Cash Recyclers, whichever is higher. Non-issuance of cash from the cash issuing branch of the bidder as per agreed time for each location; iv.
